

Usage Rules for the Appalachian Nature Preserve

As a state-designated natural area, the preserve has additional rules to ensure long-term protection of natural resources. We encourage you to enjoy the Preserve, but follow these rules to do so in a sustainable way:

- Stay on trails. Trails are intended to protect sensitive areas.
- Current trails are designated for hiking only; none are developed for cycling at this time.
- Motorized vehicles are prohibited.
- The cutting or removal of plants, dead or alive, or the disturbance of other natural resources is prohibited.
- No camping or fires
- Any person wishing to engage in activities requiring collection or otherwise disturbing the preserve must first secure written permission. Please contact the Department of Biology at bio_preserve@appstate.edu
